- **MULTIFUNCTIONAL USE**

Bonded EPDM
top layer

Bonded SBR
base layer

Primer

Substrate

**MULTI
FUNCTIONAL
USE**

Herculan SR Safescape Field consists of two layers and complies with European standard EN 14877 and the standards according to Ecospecifier. The individual layers are in-situ installed, leading to a seamless, shock absorbing floor. Herculan SR Safescape

Field is water-permeable and UV- and weather-resistant. The first layer consists of a base layer of bonded, recycled rubber (SBR). The second layer consists of a top layer of bonded EPDM granules.
